

Combine several zip files

From IMSMA Wiki

The IMSMA^{NG} installation package is almost 1 GB. If the Internet connection is too unreliable and/or too slow then we split the installation package into several smaller parts.

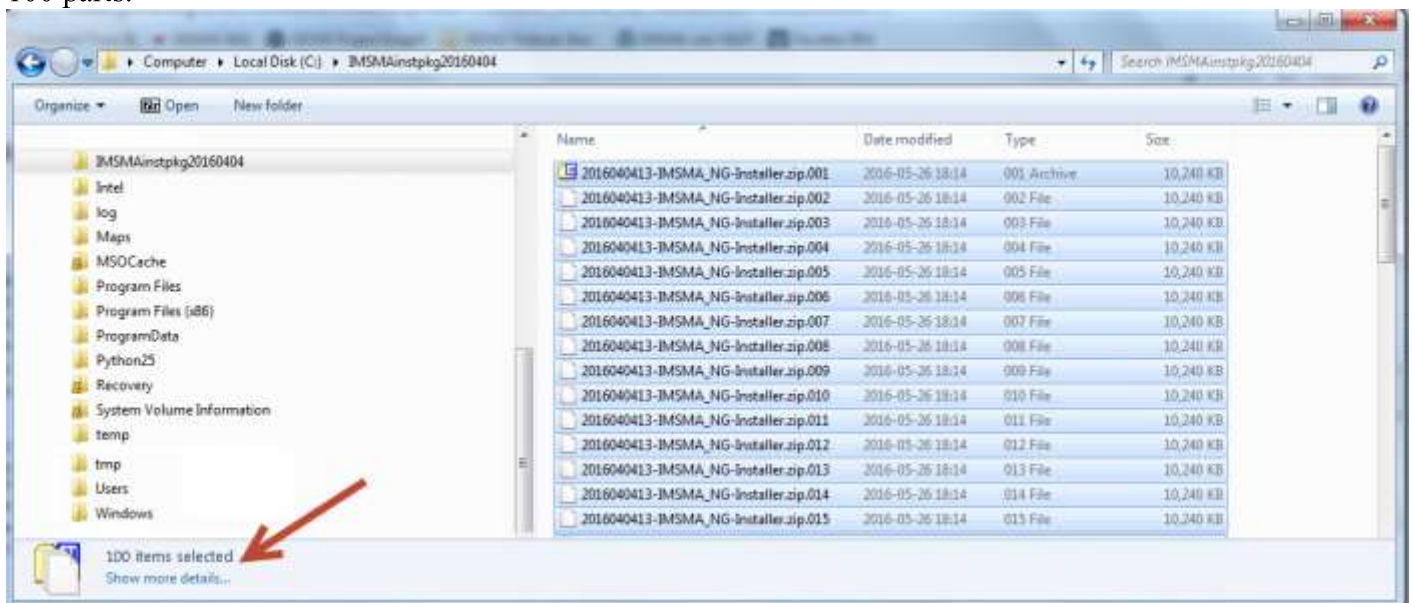

You must use the same zip program to put the parts together as was used to make the smaller parts and the names of the files may not be changed.

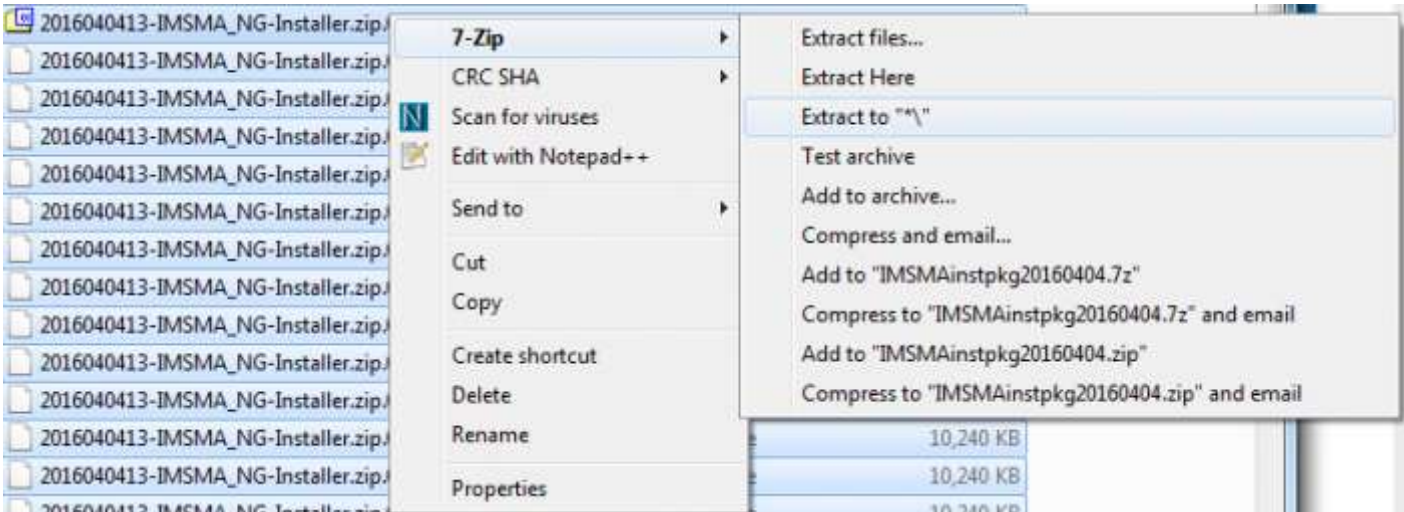

Combine/merge zip files with 7-Zip

1. If necessary, install 7zip (32- or 64-bits version) on your computer.
2. Download all parts into one folder.
3. Open Windows Explorer and go to the folder.
4. Scroll through the folder and make sure that all parts are downloaded.

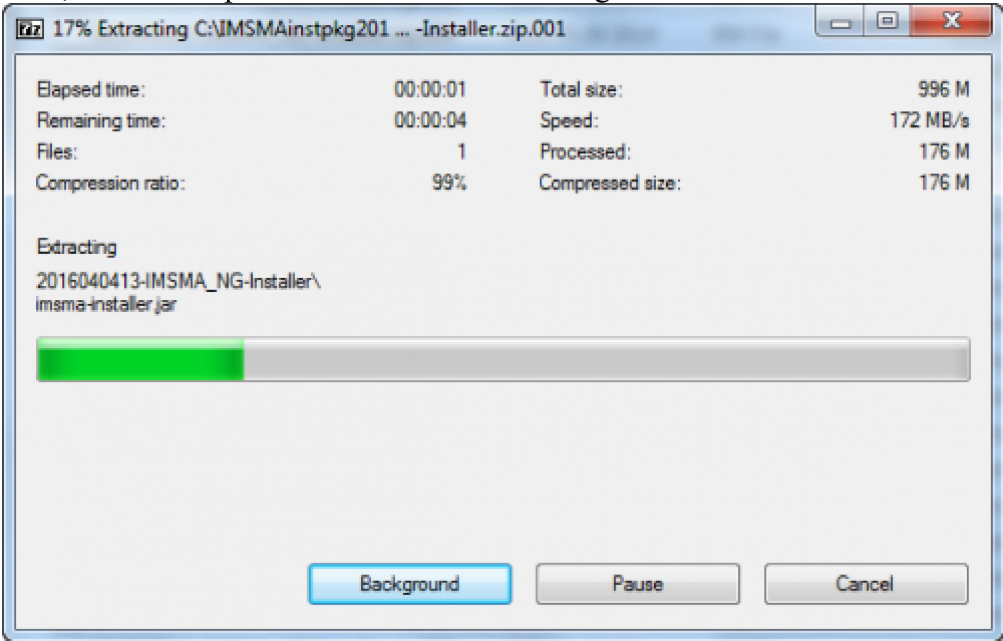

Example: if the IMSMA^{NG} installation package has been divided into 10 MB parts then you should have 100 parts.

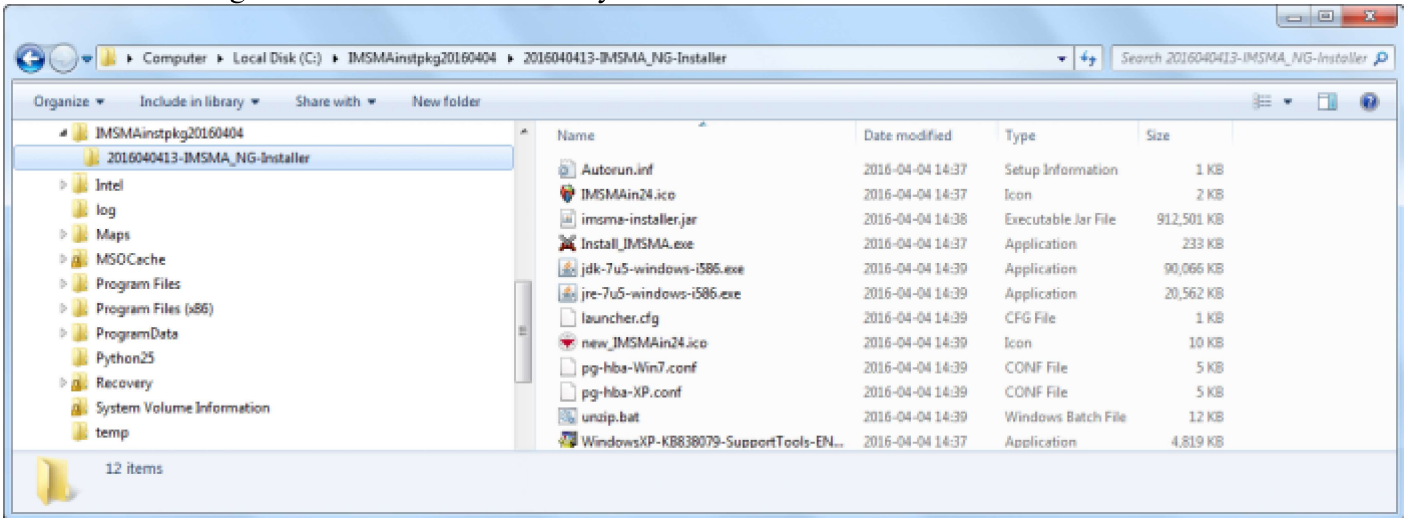

5. Select Part 1 and click Ctrl + A to select all files. Depending on your settings, you may see at the bottom of the window how many files are selected.

6. Right-click on PartI, choose 7-zip and Extract to "*" in the right-click menus.

7. The combine/merge/extract starts automatically.

8. The result will be created in a subfolder.

Data Dictionary · Difference MySQL PostgreSQL · Delete Non-functional Saved Search · Empty Reconciliation Tab · Environment variables used by IMSMA^{NG} · Error opening Data Entry Form Template · Exporting Part of Tree Structure from IMSMA^{NG}

Font and language problems · Install ODBC driver · Installation package NG is not working · Installation package SAG is not working · iReport does not start · Java automatic update · Java error during installation · Language issues · Manually create PGSQL service · Manually delete IMSMA Remote Entry service · Manually delete PGSQL service · Ports used by is IMSMA · Pre-defined Saved Searches

Renamed fields · Shutdown IMSMA Server · Start-up IMSMA Server · Switch Templates · Technical specifications for PC and tablets · Templates do not work in IMSMA Remote Entry · Two Terms Not to be Translated · Unapprove does not work · Unblock IMSMA Server · Which version of IMSMA^{NG} is installed? · Windows 8 and Windows 10 · XML Documentation
